TECHNICAL EXPERIENCE

MTP Software – Needham Heights, MA

Product Development

June 2007 to September 2007

- Studied and practiced a wide variety of topics in ASP.NET. Created an ASP.NET intranet page for the company to track our customers and if they were following their licensing guidelines.
- Performed many different technical jobs; including network admin, building servers, teaching computer skills to co-workers, and anything we needed to help keep production going.
- Spent a good amount of time on one interesting project where a client's data was automatically named with over 255 characters. This was a great project to use my problem solving skills to avoid losing valuable data.

Authentica – Lexington, MA

Quality Assurance Engineer

Summer 2004 and 2005

- Worked independently as a QA engineer on Secure Office 2.0
- Executed test plans drawn up by my boss reported problems on Bugzilla program
- Manipulated program to find problems and wrote up exact directions to recreate the problem

Foodie's Urban Market – Boston, MA

Co-op Engineer

September 2002 to December 2002

- Programmed computer scanner to accurately scan products price
- Programmed system to allow only properly authorized users to change product prices
- Implemented system to decrease improperly scanned products and employee theft
- Trained an employee to continue monitoring and upgrading the system when I left to go back to school

Catholic Memorial School – West Roxbury, MA

Broadcast Journalism

September 1999 to June 2001

- Produced a television show, aired daily school-wide, for news, sports highlights, and entertainment
- Responsible for all programming and airtime decisions; also handled all technical devices
- Responsible for network of audio visual equipment, input, connections and subsequent output to the school

PROFESSIONAL EXPERIENCE

Professional Hockey Player

April 2005 to April 2008

- Have played on various teams in SC, PA, MA and Germany
- Practice/teach leadership skills and working within a group everyday
